**CA-13  
2224****C01-08-018 - United States Can Company (US Can) vs. Southern California Edison Company (Edison).**

This modified decision finds that complainant US Can 1) failed to establish that it did not receive the notices to interrupt and therefore, pursuant to the terms of the interruptible contract, US Can is responsible for the payment of excess energy charges for failing to interrupt on November 15 and December 4-7, 2000, and 2) did establish that Edison failed to meet its contractual obligations to repair the automatic notification system within its targeted repair timeframe of approximately 30 days. The excess energy charge of \$76,306.50 for US Can's failure to interrupt on the five event dates, is reduced by the amount of charges assessed for December 6 and 7, 2000. This modified decision addresses the issues raised by Edison in its appeal filed July 31, 2002 to the Presiding Officer's Decision. This proceeding is closed.

This decision permits SCE to recover approximately \$20,000,000 in costs accruing prior to August 31, 2001, in four accounts. It finds that the release of claims by SCE in the Settlement Agreement between SCE and this Commission did not release the claims which are the subject of this decision. This proceeding is closed.

This decision determines that the respondents, Hillview and Forrester violated Section 491 and Section 825 of the California Public Utilities Code. The respondents must prepare a reconciliation of accounts for the period from January 1, 1991, to and including July 31, 1998. If that reconciliation indicates that Hillview's revenue requirement is materially inaccurate, Hillview must file an informal general rate case to properly adjust its rates. **2186**               This decision denies the application of SCE to recover in distribution rates, Administrative and General (A&G) and General and Intangible Plant (G&I) expenses that have been booked in the Transmission Revenue Requirement Reclassification Memorandum Account (TRRRMA) established in 1998 pursuant to Res E-3544. TRRRMA was established to give SCE an opportunity to recover costs that the utility had classified as transmission-related, but which the Federal Energy Regulatory Commission (FERC) declined to include in transmission rates. In the proceeding that resulted in Opinion 445, FERC declined to include approximately \$24 million of SCE's annual A&G and G&I costs in transmission rates because FERC concluded that its traditional labor ratio allocation methodology should be used rather than the multi-factor allocation methodology advocated by SCE. This decision concludes that the A&G and G&I costs at issue are not eligible for recovery in distribution rates because SCE has failed to offer any proof that the costs are both reasonable and distribution-related, as Res E-3544 requires.
